# Shazil Farukh

San Francisco, CA · m.farukh@uni.minerva.edu · 628-303-6336 · Portfolio · Github · LinkedIn

## EDUCATION

**Minerva University** — **San Francisco, CA**
*B.S. Computational Science and Business (Data Science & Statistics and Strategic Finance)* — *September 2022 - May 2026*

- **GPA:** 3.90
- Selected with a 1.02% acceptance rate to the world's most innovative university (as ranked by WURI); lived and studied across 7 global tech hubs (San Francisco, London, Seoul, Berlin, Buenos Aires, Taipei, and Tokyo)
- **Relevant Courses:** Quantitative Finance, Machine Learning, Data Structures & Algorithms, Bayesian Statistics, Probabilities

## PROFESSIONAL EXPERIENCE

**The World Bank Treasury (IBRD • IDA)** — **Washington, DC**
*Analyst* — *June 2026 – Present*

- Built Python and Power BI automation pipelines linking ED outreach, country-level promissory-note data, and status tracking, cutting a recurring Treasury operations and reporting workflow from 12+ hours to under 2 minutes
- Assessed Project Promissa and digital-asset initiatives, covering tokenization, DLT settlement, and CSD infrastructure
- Co-launched TAGG, Treasury's automation governance group, and led cross-team AI/automation initiatives across trading, risk, compliance, and operations, spanning intake, code governance, testing, deployment, and production monitoring

**The World Bank Treasury (IBRD • IDA)** — **Washington, DC**
*Treasury Summer Analyst* — *June 2025 – August 2025*

- Fixed Income Quantitative Solutions Team: Rebuilt the pricing process for 6 interest rate derivatives (SOFR cap/floor) by automating manual Excel workflows, enabling timely mark-to-market updates & scenario analysis for valuation reporting
- Capital Markets Financial Products: Developed an automated Power BI portfolio for IBRD/IDA (2,000 loans; $440B+), with monthly refresh & interest-rate/currency conversion tracking, replacing manual Excel work & speeding month-end reporting
- Asset Management Team: Built a Python pipeline integrating Bloomberg and Treasury-auction data, used Lasso / RF / XGBoost models to forecast a 0.8 bp tail in July 2025 5-yr notes, with live tests: two bull's-eyes and two correct directions

**Vermilion Rock Advisors** — **San Francisco, CA**
*Investment Banking Spring Analyst* — *December 2024 – April 2025*

- Engineered agentic LLM scrapers surfacing 10+ weekly M&A targets across 5+ databases and 100+ sites for HVAC deals
- Performed valuation analysis for the firm's sell-side client in circuit board & microelectronics manufacturing, analyzing 4 years of financial statements, customer concentration, & industry trends to determine enterprise value & assess deal viability

**Red Cell Partners** — **San Francisco, CA**
*Investment Intern* — *May 2024 – August 2024*

- Programmed robust data extraction scripts to map and spin up a relational database tracking 300+ deep-tech venture funds, founders, and transactions in the Software Supply Chain Security (SSCS) ecosystem
- Analyzed an average of 3 startup applications per week for 'Red Cell Go' (RCG), assessing business models, financials, and market potential; contributing to funding decisions for startups raising over $355M

**Siemens AG** — **Berlin, Germany**
*Financial Systems Analyst* — *January 2024 – April 2024*

- Engineered Python IC reconciliation pipelines for Siemens battery unit ahead of monthly SAP group consolidation close
- Automated SAP cost-center validation across 5 battery entities, flagging mismatches before quarterly IFRS group reporting

## PROJECTS

**Algorithmic Systematic Portfolio | Python, Alpaca API, GitHub Actions, Pandas** — *Present*

- Manage a live multi-strategy portfolio across momentum, rotation, & mean-reversion; $6.3K realized PnL, 1.9 Sharpe Ratio
- Automate daily signal generation, trade execution, and risk reporting via GitHub Actions and Alpaca API integration

**Three-Lens Equity Analysis (Senior Capstone Thesis) | Python, XGBoost, Arch, Hmmlearn** — *April 2026*

- Blended stochastic risk modeling and machine learning architectures with fundamental equity valuation to evaluate Fortinet
- Triangulated a 43% VaR, 32% alpha probability, and $91 DCF target into a tactical "Hold" rating for Investors

**Scout (Deep Agents Hackathon) | 1st Place | LangGraph, FastAPI, TypeScript, PostgreSQL** — *March 2026*

- Developed an autonomous AI voice agent system for real-time apartment hunting and pipeline orchestration
- Integrated Airbyte ingestion, LangGraph state planning, automated Bland AI calling, and calendar OAuth booking

**ClearOwn | Agentic FinTech Compliance Platform | n8n, Base Sepolia, Crossmint, MiniMax** — *February 2026*

- Engineered a multi-agent system to map and resolve true corporate ownership across nested network graphs
- Automated jurisdiction risk analysis and deployed smart contracts to generate verifiable compliance proofs

## SKILLS & INTERESTS

**Technical Skills:** Python, SQL, TypeScript, JavaScript, Kotlin, Java Spring Boot, Next.js, FastAPI, PostgreSQL, Supabase, Git
**Stack:** Bloomberg Terminal, PyTorch, TensorFlow, LangGraph, NumPy, Pandas, XGBoost, Statsmodels, Zipline, PyMC, Power BI
**Interests:** Soccer (Real Madrid Youth Coach), Tennis, Cricket, Cooking, Debates, Public speaking
